

ravanos create bootable USB flash drive

Create bootable USB flash drive

Linux

Dd utility

The easiest way. It is recommended to record in this way.

!!! Attention!

This will destroy all data on your USB drive!

Hint

You can find out the path to the USB device by running the command `lsblk`. Make sure it is not mounted.

```
dd bs = 4M if = / image.iso of = / dev / sd [x]
```
