

List of Packages in the Distribution`

Lists of packages included in the distribution / repository are contained in the distribution / repository itself.

In general, the path to the lists consists of:

Distribution names:

- orel
- smolensk
- leningrad

Component names:

- main
- contrib
- non-free

Architecture names:

- binary-amd64
- binary-i386
- binary-e2k-8c

Packages can be stored in a packaged form (the name of the file Packages.gz) or in an unpacked form (the name of the file Packages).

```
dists / {orel, smolensk, leningrad} / {contrib, main, non-free} / {binary-amd64,  
binary-i386, binary-e2k-8c} / {Packages.gz, Packages}
```

For example, the path to the list of packages "contrib" in OS ON Orel 2.12 Yandex repositories:

<ftp://mirror.yandex.ru/astra/current/orel/repository/dists/orel/contrib/binary-amd64>

Paths to files with lists:

For OS He Eagle:

```
dists / orel / contrib / binary-amd64 / Packages.gz  
dists / orel / main / binary-amd64 / Packages.gz  
dists / orel / non-free / binary-amd64 / Packages.gz  
For OS CH Smolensk
```

```
dists / smolensk / contrib / binary-amd64 / Packages.gz  
dists / smolensk / main / binary-amd64 / Packages.gz  
dists / smolensk / non-free / binary-amd64 / Packages.gz  
For OS CH Leningrad
```

```
dists / leningrad / contrib / binary-e2k-8c / Packages.gz  
dists / leningrad / main / binary-e2k-8c / Packages.gz  
dists / leningrad / non-free / binary-e2k-8c / Packages.gz
```
